CHECKLIST

The 20-point launch checklist

Tick each item before you send traffic to your store. Where hiring help makes sense, you will find the guide for that service.

01 Brand

- [ ] Domain name bought and connected
- [ ] Logo in vector, transparent PNG and square icon versions Hire help →
- [ ] Brand colors and fonts chosen Hire help →
- [ ] Professional email address on your domain

02 Store

- [ ] Theme set up and tested on mobile Hire help →
- [ ] Payments, shipping zones and taxes configured Hire help →
- [ ] Policy pages: shipping, returns, privacy and terms Hire help →
- [ ] About and Contact pages written Hire help →

03 Products

- [ ] 4 to 6 edited images per product Hire help →
- [ ] Descriptions that answer buyer questions Hire help →
- [ ] SEO titles and meta descriptions Hire help →
- [ ] Variants, prices and stock checked

04 Tracking

- [ ] Meta Pixel with standard events Hire help →
- [ ] Conversions API with deduplication Hire help →
- [ ] GA4 and Google Search Console connected
- [ ] Test order placed and checked in Events Manager Hire help →

05 Marketing

- [ ] Email signup popup and welcome email
- [ ] First 3 to 5 ad creatives, including video Hire help →
- [ ] Abandoned cart email
- [ ] Ad account, audiences and testing plan ready Hire help →

Before you launch: place a real test order, check the confirmation email, and confirm the Purchase event shows up once in Meta Events Manager with the right value.

Lean launch

$290 – $1,000

Logo, photo editing, product copy and tracking. You set up the store yourself.

Full launch

$840 – $2,500

Store setup, logo, photos, copy, tracking, UGC videos and Meta ads setup.

Not included: your platform plan, theme, apps, domain, stock and ad budget. Get a custom estimate with the calculator at freelancepicks.com/guides/store-launch-cost/.

PRIORITIES

What to outsource first

Outsource work that is skill-heavy and done once. Keep work that depends on your knowledge of the product and your customers.

1. **Tracking before ads**
   Pixel and Conversions API, so you know which ads make money. Guide
2. **Product images**
   Images do most of the selling. Good phone photos plus editing go a long way. Guide
3. **Store setup, if you are not technical**
   A developer can save you weeks. Use collaborator access, never your password. Guide
4. **A clean logo**
   Original, readable at small sizes, with vector files. Guide
5. **Product copy**
   Descriptions that answer real buyer questions and help SEO. Guide
6. **Video creatives**
   UGC and product videos are often the best-performing ads. Guide
7. **Ads setup, then management**
   Start with a one-time setup and testing plan, then decide on monthly help. Guide

6 rules for hiring safely

- ✓ Keep messages and payments on the platform
- ✓ Never share passwords. Use collaborator or partner access.
- ✓ Start with a small paid test or sample
- ✓ Agree on deliverables, revisions and deadline in writing
- ✓ Own your accounts: store, domain, ad account and pixel
- ✓ Check recent reviews from similar projects
